EasyLink Version 7.4.4

No changes to functionality

EasyLink Version 7.4.3

----

* Fixed bug where waviness (except for /xwp) was calculated using wrong method

* Changed /gcc-tag to force best fit average center

* Fixed minor calculation bug related to waviness and gcc in combination

EasyLink Version 7.4.2

----

* Fixed issue where Horizontal and Train files couldn't be opened

EasyLink Version 7.4.1

----

* The old short waviness calculation is /xwa. The new one is /xwp

EasyLink Version 7.4.0

----

* Short waviness calculations can use both methods. The old one is /xwao. The new method is still /xwa

EasyLink Version 7.3.2

----

* Added new tag for flange calculation #FLCOL (Circle count) och #FLROW (Points in a circle.

* Updated /xwa short waviness calculation in flange

* Ceiling rounding for points in waveiness length in flange calculation

EasyLink Version 7.3.1

Only internal

EasyLink Version 7.3.0

----

* Added new tag for specific flange calculation.

* Added tag for printing template name to report (#TEMPLATE).

EasyLink Version 7.2.0

----

* Added support for .xlsx-files

* Added button for erasing templates in the Edit Existing Template dialog

* Fixed broken version log
